in a
Constantly
Changing
World

The Class of 2021

- They are the last class to be born in the 1900s, the last of the Millennials — enter next year, on cue, Generation Z
- They are the first generation for whom a “phone” has been primarily a video game, direction finder, electronic telegraph, and research library.
- By the time they entered school, laptops were outselling desktops.
- Whatever the subject, there’s always been a blog for it.
- A movie scene longer than two minutes has always seemed like an eternity.
- Wikipedia has steadily gained acceptance by their teachers.
- It is doubtful that they have ever used or heard the high-pitched whine of a dial-up modem.
